

◆ Introduction & Features

EXEET® SHINELUX has a good reflective index and haze which make good diffusing, good transmittance and a brilliant surface. EXEET® SHINELUX have excellent concealment, good UV resistant and also have very good weathering ageing resistance, easily formed property, and high durability. Especially it has excellent molding performance. Also it has UL94 V-2 grade certificate. So EXEET® SHINELUX can be used a wide range of industries and form. Compare to other companies, EXEET® SHINELUX offers good Transmission, Lamp Efficiency and Low Power consumption. It will serve you an efficiency of energy. **LH0570B** is model name of Polycarbonate diffusion sheet. It is used for the LED diffusion sheet. **LH0570B** is polish/ Emboss type. Finally, Excellent Diffusion Transmission gives you brightness with less energy.

◆ APPLICATION

Signboard
Store Display
Molded Letters
Shop Fittings
Illumination Graphic Panel
LED Lamp Cover

◆ Typical Property Values

Properties	Test Method	English		SI	
		Value	Units	Value	Units
Light Transmittance	ASTM D1003	%	69.8	%	69.8
Water Absorption	ASTM D570	%	0.12	%	0.12
Tensile Yield Strength	ASTM D638	psi	9456	Mpa	65.2
Flexural Strength	ASTM D790	psi	14330	MPa	98.8
Tensile Modulus	ASTM D638	psi	335037	GPa	2.31
Flexural Modulus	ASTM D790	psi	375648	GPa	2.59
Izod Impact @3mm (P:Partial destruction)	ASTM D256	ft-lbs/in	N/B	J/m	N/B
Rockwell Hardness(HRR) R-SCALE	ASTM D785	-	89	-	89
Deflection Temperature Under Load(1.82 Mpa)	ASTM D648-07 (Method B)	°F	275	°C	135
Heating of dimensional change(Width) ((130±2)°C×30min)	KS M 3501 : 2004	%	0.3	%	0.3
Heating of dimensional change(Length) ((130±2)°C×30min)	KS M 3501 : 2004	%	-0.5	%	-0.5
Flammability class	UL94V	-	V2	-	V2
Surface roughness (EMBO)	-	BOTH SIDE EMBO
